
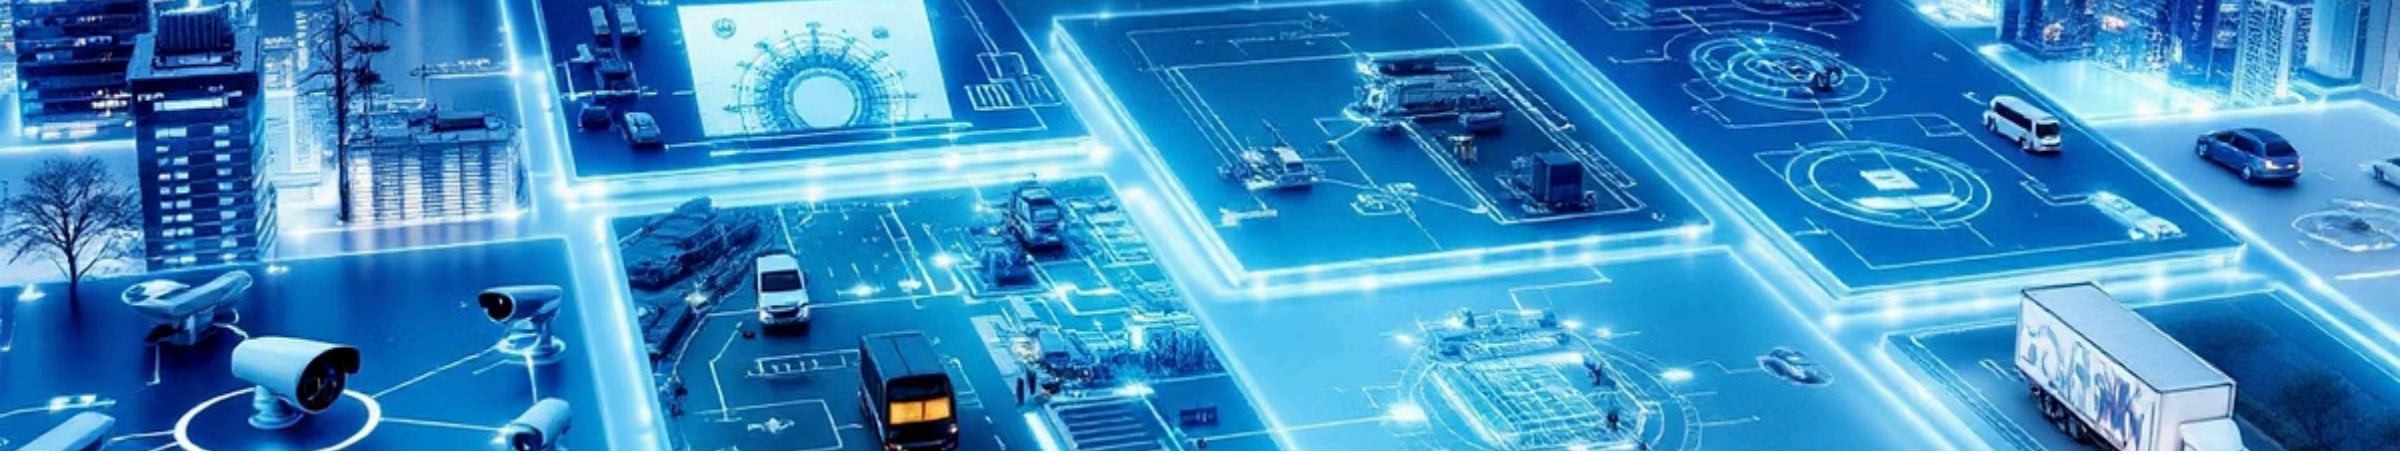
IOT eSim Wholesale Solutions

Delivering next-generation connectivity tailored for today's data-driven ecosystems. Our SIM solutions ensure seamless communication across devices in the UK, EU, and USA.

by UK Telecom Distribution Ltd



Industries We Power

Trackers

Reliable coverage for GPS and asset tracking systems with precision performance.

Surveillance

Uninterrupted connectivity for real-time remote monitoring and CCTV security systems.

Vehicles

Effortless tracking and diagnostics for fleet management and automotive applications.

Engineered for Extreme Environments

Extended Temperature Range

Operating capacity from -40°C to +105°C for all weather conditions.

Shock and Vibration Resistant

Designed to withstand physical stress in mobile and industrial applications.

Corrosion Resistant

Protected against moisture and chemical exposure for extended lifespan.

Enterprise-Grade Features

eSIM Management Portal

Full access to comprehensive monitoring and management tools for your device fleet.

Flexible Plans

Customised connectivity solutions that scale with your business requirements.

Multi-Region Coverage

Seamless connectivity across UK, EU, and USA markets from a single provider.

Dedicated Support

Technical and commercial support teams available for partnership assistance.

Surveillance Use Cases

Remote CCTV Monitoring

Connect surveillance systems to central monitoring stations. Ensure continuous footage transmission regardless of location.

- Real-time alerts
- Motion detection
- Secure data transmission

Connected Alarm Systems

Integrate IoT connectivity with security alarms. Create comprehensive security ecosystems with instant notifications.

- Remote arming/disarming
- Sensor integration
- Backup connectivity

Vehicle Connectivity Solutions

Car Rental Tracking

Monitor vehicle location and status for rental fleets with reliable connectivity.

Driver Safety Profiling

Collect driving behaviour data to improve safety protocols and reduce risks.

Real-time Vehicle Status

Access diagnostic information instantly for preventative maintenance solutions.

Logistics Optimisation

Fleet Dispatch Optimisation

Improve delivery efficiency through real-time location tracking and smart scheduling.

Route Planning

Calculate optimal delivery routes based on traffic, weather, and delivery priorities.

Advanced Vehicle Analytics

Gather comprehensive performance data to optimise fleet operations and maintenance.

Healthcare Applications

Remote Patient Monitoring

Enable daily health tracking with connected medical devices. Patients stay home while maintaining clinical oversight.

Data Collection

Vital signs and health metrics automatically recorded. Secure transmission to healthcare providers.

Automatic GP Reporting

Generate comprehensive health reports. Alert medical staff to concerning changes in patient status.

Retail Innovation

Smart Vending Systems

Connected machines that report sales, inventory levels, and maintenance needs.

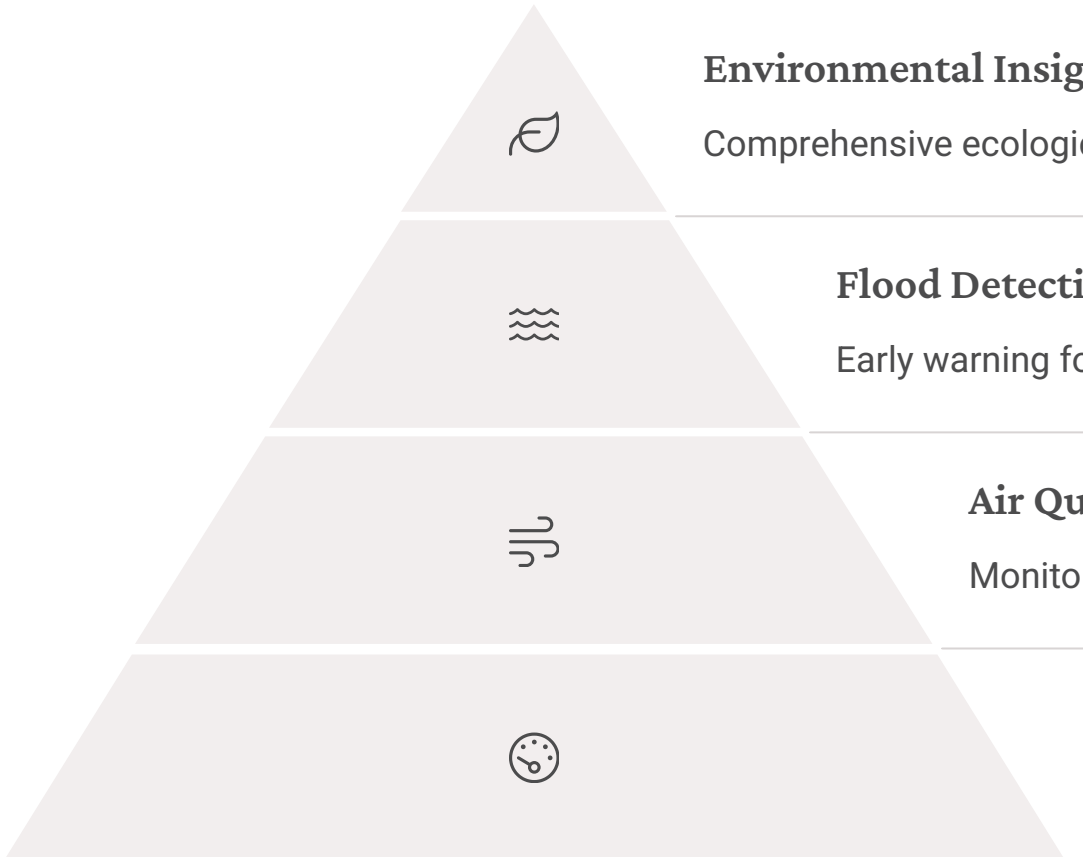
Chiller Temperature Control

Remote monitoring of refrigeration units to maintain product quality and safety.

NFC Inventory Updates

Automatic stock management through NFC-enabled shelving and product tags.

Utility & Environmental Monitoring



Environmental Insight

Comprehensive ecological data collection

Flood Detection Systems

Early warning for water-level changes

Air Quality Sensors

Monitor atmospheric conditions in real-time

Remote Utility Metering

Track gas, water, and electric usage

IOTeSim Cloud Platform

Single Dashboard Control

Manage all connected devices from one intuitive interface

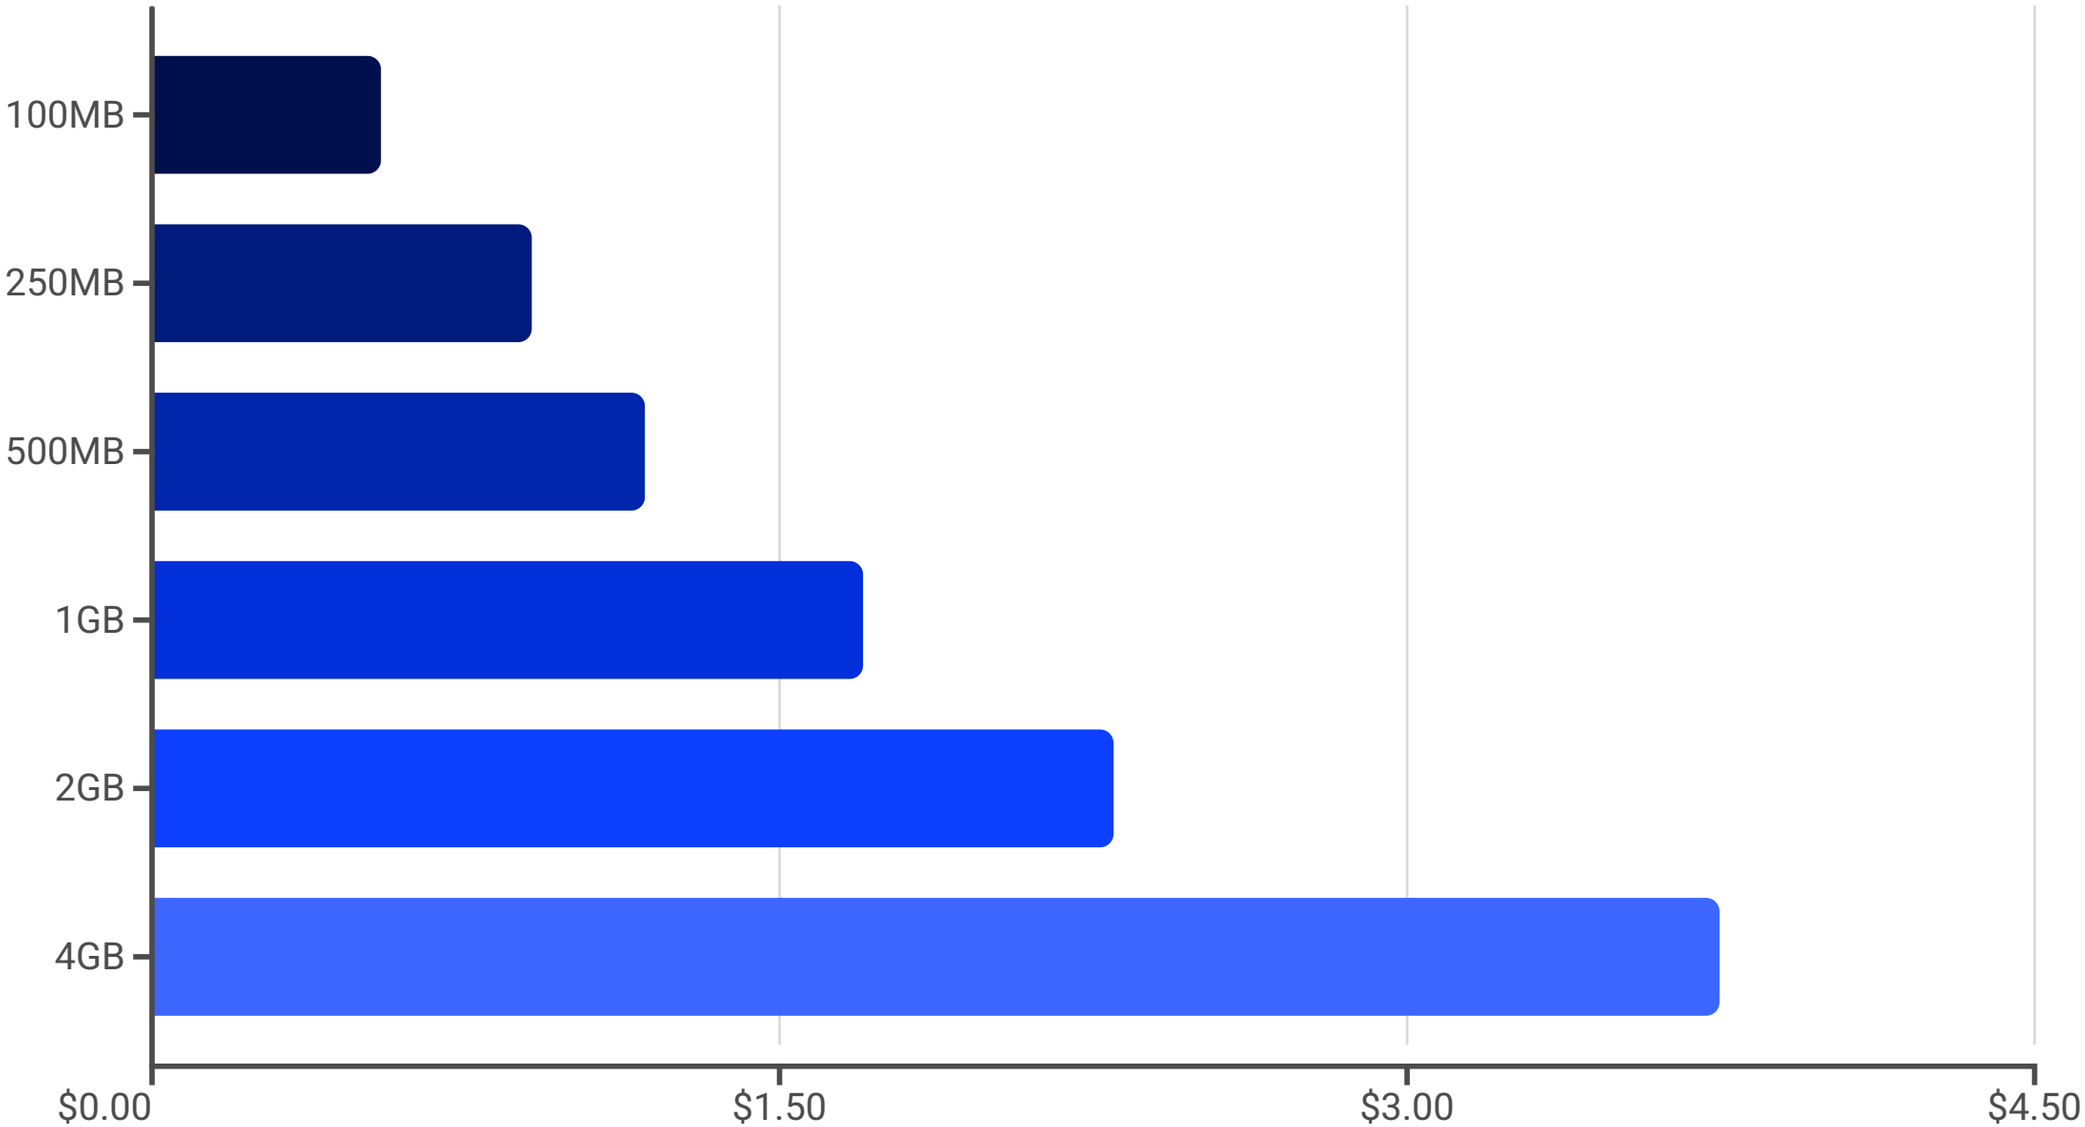
Real-Time Monitoring

Track usage, performance, and device status instantly

Dynamic Configuration

Adjust rate plans and settings remotely as needs change

Wholesale Data Plans



All plans valid across UK, EU, and USA. Prices are half of our standard retail rates.

Extra Benefits

100%

Portal Access

Free access to our comprehensive SIM management portal with every plan.

£££

Volume Discounts

Tailored pricing for high-volume partners with escalating savings tiers.

24/7

Technical Support

UK-based technical support team available for all integration needs.

API

Integration Tools

Full API access for scalable integration with your existing systems.

Partner With IOT eSim Today

Industrial

Connect and monitor industrial equipment for improved efficiency and maintenance.

Retail

Transform customer experiences with connected inventory and smart systems.

Healthcare

Enhance patient care with secure, reliable remote monitoring systems.

Fleet

Optimize vehicle management with real-time tracking and diagnostic solutions.

Contact us today to access wholesale rates and discuss your project requirements.
